Subject Index: Volume 38

Abdominal aortic aneurysm
Preliminary results of endovascular abdominal aortic aneurysm exclusion with the AneuRX stent-graft, 1040
Ablation
See also Surgery
To ablate or operate? that is the question (editorial), 1707
Attenuation of interatrial conduction using right atrial septal catheter ablation, 892
Double potentials along the ablation line as a guide to radiofrequency ablation of typical atrial flutter, 750
ACC
ACC/AHA clinical competence statement on electrocardiography and ambulatory electrocardiography, 2091
ACC/AHA/ESC guidelines for the management of patients with atrial fibrillation: executive summary, 1231
ACC/AHA guidelines for the evaluation and management of chronic heart failure in the adult: executive summary, 2101
ACCME standards for commercial support—time for a change?, 916
AHA/ACC guidelines for preventing heart attack and death in patients with atherosclerotic cardiovascular disease: 2001 update, 1581
American College of Cardiology key elements and data definitions for measuring the clinical management and outcomes of patients with acute coronary syndromes, 2114
Committee appointments, 272
Results from late-breaking clinical trial sessions at ACC 2001, 595
ACC News
Newly elected members of the college, 1770
President's page: forging change in health care policy—the principle is the thing, 270
President's page: guidelines: tools for building better patient care, 2088
President's page: quality of care: a moving target worthy of pursuit, 1766
President's page: sewing the seeds of legislative success: grassroots advocacy, 1578
President's page: the changing face of research, 584
President's page: the future of print, 1228
President's page: the importance of the cardiologist, 918
Action potentials
Progressive action potential duration shortening and the conversion from atrial flutter to atrial fibrillation in the isolated canine right atrium, 1757
Acute coronary syndromes
Activation of cardiac renin-angiotensin system in unstable angina, 49
American College of Cardiology key elements and data definitions for measuring the clinical management and outcomes of patients with acute coronary syndromes, 2114
Angiotensin-converting enzyme inhibition is associated with reduced troponin release in non-ST-elevation acute coronary syndromes, 724
Increased circulating monocyte activation in patients with unstable coronary syndromes, 1340
Interaction between smoking and the glycoprotein IIIa $P1^{A2}$ polymorphism in non-ST-elevation acute coronary syndromes, 1639
Is early invasive treatment of unstable coronary artery disease equally effective for both women and men?, 41
Long-term risk stratification for survivors of acute coronary syndromes, 56
Prognostic value of ST segment depression in acute coronary syndromes: insights from PARAGON-A applied to GUSTO-IIb, 64
Prognostic value of troponin in patients with non-ST elevation acute coronary syndromes: a meta-analysis, 478
Should we catheterize all patients with unstable angina? No—only the ones with coronary artery disease (editorial), 977
Use of risk stratification to identify patients with unstable angina likeliest to benefit from an invasive versus conservative management strategy, 969
Acute myocardial infarction
See Myocardial infarction
Adenosine triphosphate test
Adenosine triphosphate test: a bedside diagnostic tool for identifying the mechanism of supraventricular tachycardia in patients with palpitations, 173
African Americans
African American patients and heart disease (editorial), 1577
Race and the decision to refer for coronary revascularization, 698
Age and aging
See also Elderly; Pediatric cardiology
Age-associated changes in regional aortic pulse wave velocity, 1123
Effect of age on mortality, hospitalizations and response to digoxin in patients with heart failure: the DIG study, 806
No loss of the in vivo efficacy of ischemic preconditioning in middle-aged and old rabbits, 1741
Alcohol
Alcohol consumption and risk of coronary heart disease among men with type 2 diabetes mellitus, 1836
Aldosterone
Relationship between transcardiac extraction of aldosterone and left ventricular remodeling in patients with first acute myocardial infarction: extracting aldosterone through the heart promotes ventricular remodeling after acute myocardial infarction, 1375
Alpha$_1$-adrenoceptors
Lack of evidence for peripheral alpha$_1$-adrenoceptor blockade during long-term treatment of heart failure with carvedilol, 1463
Ambulatory electrocardiography
ACC/AHA clinical competence statement on electrocardiography and ambulatory electrocardiography, 2091
American College of Cardiology
See ACC
Amlodipine
Long-term administration of amlodipine prevents decompensation to diastolic heart failure in hypertensive rats, 1539
Anasarca
Anasarca-mediated attenuation of the amplitude of the electrocardiogram complexes: a description of a heretofore unrecognized phenomenon, 756
Anemia
Reduced kidney function and anemia as risk factors for mortality in patients with left ventricular dysfunction, 955
Aneurysms
Endovascular aneurysm repair with the AneuRx stent-graft is safe, but is it effective? (editorial), 1047
Preliminary results of endovascular abdominal aortic aneurysm exclusion with the AneuRX stent-graft, 1040
Angina pectoris
See also Chest pain
Activation of cardiac renin-angiotensin system in unstable angina, 49
Diabetes mellitus prevents ischemic preconditioning in patients with a first acute anterior wall myocardial infarction, 1007
Endothelium-dependent vasodilation is independent of the plasma L-arginine/ADMA ratio in men with stable angina, 497
Exercise test that indicates a low risk of events, 1974
High level of physical activity preserves the cardioprotective effect of preinfarction angina in elderly patients, 1357
Increased circulating monocyte activation in patients with unstable coronary syndromes, 1340
Increased production of inflammatory cytokines in patients with silent myocardial ischemia, 1895
Preinfarct angina and exercise: yet another reason to stay physically active (editorial), 1366
Preinfarct angina protects against out-of-hospital ventricular fibrillation in patients with acute occlusion of the left coronary artery, 1369
Should we catheterize all patients with unstable angina? No—only the ones with coronary artery disease (editorial), 977
Use of risk stratification to identify patients with unstable angina likeliest to benefit from an invasive versus conservative management strategy, 969
Angiography
Clinical and quantitative coronary angiographic predictors of coronary restenosis, 645
Does the presence a thrombus seen on a coronary angiogram affect the outcome after percutaneous coronary angioplasty? An angiographic trials pool data experience, 624
Effect of glycoprotein IIb/IIIa receptor inhibition on angiographic complications during percutaneous coronary intervention in the ESPRIT trial, 653
Gender differences and temporal trends in clinical characteristics, stress test results and use of invasive procedures in patients undergoing evaluation for coronary artery disease, 690
Influence of planned six-month follow-up angiography on late outcome after percutaneous coronary intervention, 1061
Relationship between vascular wall shear stress and flow-mediated dilation: endothelial function assessed by phase-contrast magnetic resonance angiography, 1859
Angioplasty
See Balloon angioplasty; Percutaneous transluminal coronary angioplasty

Angioscopy
Healing process of infarct-related plaques: insights from 18 months serial angioscopic follow-up, 1916
Mechanical and structural characteristics of vulnerable plaques: analysis by coronary angioscopy and intravascular ultrasound, 99
Angiotensin-converting enzyme
Predictors of coronary in-stent restenosis: importance of angiotensin-converting enzyme gene polymorphism and treatment with angiotensin-converting enzyme inhibitors, 1434
Angiotensin-converting enzyme inhibitors
See also specific agent
Angiotensin-converting enzyme inhibition is associated with reduced troponin release in non-ST-elevation acute coronary syndromes, 724
Anti-ischemic effects of angiotensin-converting enzyme inhibition in hypertension, 1116
Attenuation of angiotensin II-mediated coronary vasoconstriction and vasodilatory action of angiotensin-converting enzyme inhibitor in pacing-induced heart failure in dogs, 1188
Cardiac nitric oxide production due to angiotensin-converting enzyme inhibition decreases beta-adrenergic myocardial contractility in patients with dilated cardiomyopathy, 429
Effects of combination of angiotensin-converting enzyme inhibitor and angiotensin receptor antagonist on inflammatory cellular infiltration and myocardial interstitial fibrosis after acute myocardial infarction, 1207
Oxidative capacity of skeletal muscle in heart failure patients versus sedentary or active control subjects, 947
Potentiation of bradykinin-induced tissue plasminogen activator release by angiotensin-converting enzyme inhibition, 1402
Predictors of coronary in-stent restenosis: importance of angiotensin-converting enzyme gene polymorphism and treatment with angiotensin-converting enzyme inhibitors, 1434
Renal function: the cinderella of cardiovascular risk profile, 1782
Angiotensin II
Activation of cardiac renin-angiotensin system in unstable angina, 49
Attenuation of angiotensin II-mediated coronary vasoconstriction and vasodilatory action of angiotensin-converting enzyme inhibitor in pacing-induced heart failure in dogs, 1188
Angiotensin receptor blocker
Effects of combination of angiotensin-converting enzyme inhibitor and angiotensin receptor antagonist on inflammatory cellular infiltration and myocardial interstitial fibrosis after acute myocardial infarction, 1207
Angiotensin type 1 receptors
Angiotensin type 1 receptor antagonism reverses abnormal coronary vasomotion in atherosclerosis, 1089
Irbesartan, an angiotensin type 1 receptor inhibitor, regulates the vascular oxidative state in patients with coronary artery disease, 1662
Antiarrhythmic drugs
Antiarrhythmic drug therapy in the Multicenter UnSustained Tachycardia Trial (MUSTT): drug testing and as-treated analysis, 344
Over-AVID subgroup analysis (letter), 1586
Anti-endotoxin core antibodies
Impact of anti-endotoxin core antibodies on endotoxin and cytokine release and ventilation time after cardiac surgery, 124
Antioxidants
Antioxidant vitamins and the risk of carotid atherosclerosis, 1788
Antioxidant vitamins attenuate oxidative stress and cardiac dysfunction in tachycardia-induced cardiomyopathy, 1734
Do antioxidant vitamins protect against atherosclerosis? the proof is still lacking (editorial), 1795
Effects of lipid-lowering and antioxidant vitamin therapies on flow-mediated vasodilation of the brachial artery in older adults with hypercholesterolemia, 1806
Physical training in patients with chronic heart failure enhances the expression of genes encoding antioxidative enzymes, 194
Aorta
Age-associated changes in regional aortic pulse wave velocity, 1123
Cardiac cycle-dependent changes in aortic area and distensibility are reduced in older patients with isolated diastolic heart failure and correlate with exercise intolerance, 796
Coarctation of the aorta: outcome of pregnancy, 1728
Endovascular stents for coarctation of the aorta: initial results and immediate-term follow-up, 1518
Postoperative stroke in cardiac surgery is related to the location and extent of atherosclerotic disease in the ascending aorta, 131
Stent implantation for aortic coarctation: the treatment of choice in adults?, 1524
Aortic counterpulsation
See Intra-aortic balloon counterpulsation
Aortic regurgitation
Discrete subaortic stenosis in adults: increased prevalence and slow rate of progression of the obstruction and aortic regurgitation, 835
Aortic stenosis
C-reactive protein is increased in patients with degenerative aortic valvular stenosis, 1078
Natural history of discrete subvalvar aortic stenosis: management implications (editorial), 843
Aortic valve
Aortic valve stenosis and aortic atherosclerosis: different manifestations of the same disease?, 827
Association of mitral annulus calcification, aortic valve sclerosis and aortic root calcification with abnormal myocardial perfusion single photon emission computed tomography in subjects age ≤ 65 years old, 1988
Apical ballooning
Transient left ventricular apical ballooning without coronary artery stenosis: a novel heart syndrome mimicking acute myocardial infarction, 11
Apoptosis
Increased intimal apoptosis in coronary atherosclerotic vessel segments lacking compensatory enlargement, 1333
Inhibition of caspase-3 improves contractile recovery of stunned myocardium independent of apoptosis inhibitory effects, 2063
Leukocyte mitochondria depolarization and apoptosis in advanced heart failure: clinical correlations and effect of therapy, 1695
L-Arginine
Endothelium-dependent vasodilation is independent of the plasma L-arginine/ADMA ratio in men with stable angina, 497
Arrhythmias
See also Atrial fibrillation; Atrial flutter; Tachycardia; Ventricular fibrillation
Coronary artery revascularization in patients with sustained ventricular arrhythmias in the chronic phase of a myocardial infarction (letter), 1268
Life-threatening ventricular arrhythmias due to transient or correctable causes: high risk for death in follow-up, 1718
Progression to chronic atrial fibrillation after pacing: The Canadian Trial of Physiologic Pacing, 167
Risk stratification for arrhythmic events: are the bangs worth the bucks? (editorial), 1912

Inflammation
Pressure rinsing of coronary stents immediately before implantation reduces inflammation and neointimal hyperplasia, 562
Statin therapy, inflammation and recurrent coronary events in patients following coronary stent implantation, 2006

Insulin
Coronary endothelial dysfunction in the insulin-resistant state is linked to abnormal pteridine metabolism and vascular oxidative stress, 1821

Insulin-like growth factor-1
Markedly reduced insulin-like growth factor-1 in the acute phase of myocardial infarction, 26

Interatrial septum
Ablation of atrial tachycardia originating from the vicinity of the atrioventricular node: significance of mapping both sides of the interatrial septum, 394
Attenuation of interatrial conduction using right atrial septal catheter ablation, 892

Interleukin-1
Effect of interleukin-1 gene polymorphisms on the development of coronary artery disease associated with *Chlamydia pneumoniae* infection, 712

Interleukin-1β
Neutralization of interleukin-1β in the acute phase of myocardial infarction promotes the progression left ventricular remodeling, 1546

Interventional cardiology
Does the presence a thrombus seen on a coronary angiogram affect the outcome after percutaneous coronary angioplasty? An angiographic trials pool data experience, 624
Effect of intracoronary radiation for the treatment of recurrent in-stent restenosis in patients with chronic renal failure, 1049
Geographic miss during catheter-based intracoronary beta-radiation: incidence and implications in the BRIE Study, 415
Impact of pre-interventional arterial remodeling on subsequent vessel behavior after balloon angioplasty: a serial intravascular ultrasound study, 2001
Impact of statistical adjustment on economic profiles of interventional cardiologists, 1416
Percutaneous coronary intervention versus coronary artery bypass graft surgery for patients with medically refractory myocardial ischemia and risk factors for adverse outcomes with bypass: a multicenter, randomized trial, 143
Procedural outcomes and long-term survival among patients undergoing percutaneous coronary intervention of a chronic total occlusion in native coronary arteries: a 20-year experience, 409
Results from late-breaking clinical trial sessions at ACC 2001, 595
Treatment of diffuse in-stent restenosis with rotational atherectomy followed by radiation therapy with a rhenium-188-mercaptoacetyltrigylcine-filled balloon, 631

Intima
Accelerated intimal thickening in carotid arteries of balloon-injured rats after immunization against heat shock protein 70, 1564
Antioxidant vitamins and the risk of carotid atherosclerosis, 1788
Increased intimal apoptosis in coronary atherosclerotic vessel segments lacking compensatory enlargement, 1333

Intra-aortic balloon counterpulsation
Current practice of intra-aortic balloon counterpulsation: results from the Benchmark Registry, 1456

Intra-atrial re-entrant tachycardia
Coexistence of type I atrial flutter and intra-atrial re-entrant tachycardia in patients with surgically corrected congenital heart disease, 377

Intravascular ultrasound
Elective stenting of unprotected left main coronary artery stenosis, 1054
Impact of lipid abnormalities in development and progression of transplant coronary disease: a serial intravascular ultrasound study, 206
Impact of pre-interventional arterial remodeling on subsequent vessel behavior after balloon angioplasty: a serial intravascular ultrasound study, 2001
Intravascular ultrasound-guided percutaneous transluminal coronary angioplasty with provisional spot stenting for treatment of long coronary lesions, 1427
Mechanical and structural characteristics of vulnerable plaques: analysis by coronary angioscopy and intravascular ultrasound, 99
Optimizing stent expansion with new stent delivery systems, 1622

Intravenous immunoglobulin
Enhanced gene expression of chemokines and their corresponding receptors in mononuclear blood cells in chronic heart failure—modulatory effect of intravenous immunoglobulin, 187

15-(p-[iodine-123]iodophenyl)-3-(R,S) methylpentadecanoic acid
Significance of reduced uptake of iodinated fatty acid analogue for the evaluation of patients with acute chest pain, 1888

Irbesartan
Irbesartan, an angiotensin type 1 receptor inhibitor, regulates the vascular oxidative state in patients with coronary artery disease, 1662

Ischemia
See Myocardial ischemia

Jugular veins
Decrease in jugular venous oxygen saturation during normothermic cardiopulmonary bypass predicts short-term postoperative neurologic dysfunction in elderly patients, 1450

Kidneys
Effect of intracoronary radiation for the treatment of recurrent in-stent restenosis in patients with chronic renal failure, 1049
Prognostic value of serum cardiac troponin I in ambulatory patients with chronic heart renal failure undergoing long-term hemodialysis, 991
Reduced kidney function and anemia as risk factors for mortality in patients with left ventricular dysfunction, 955
Renal function: the cinderella of cardiovascular risk profile, 1782
Renal insufficiency and cardiovascular events in postmenopausal women with coronary heart disease, 705

Left bundle branch block
Long-term left ventricular pacing: assessment and comparison with biventricular pacing in patients with severe congestive heart failure, 1966

Left ventricle
Absolute, not relative, changes are important when interpreting trial data (letter), 2132
Aspirin impairs reverse myocardial remodeling in

patients with heart failure treated with beta-blockers, 1950
Biphasic changes in left ventricular end-diastolic pressure during dynamic exercise in patients with nonobstructive hypertrophic cardiomyopathy, 335
Contrast echocardiography improves the accuracy and reproducibility of left ventricular remodeling measurements, 867
Current practice of intra-aortic balloon counterpulsation: results from the Benchmark Registry, 1456
Development of left ventricular hypertrophy in adults with hypertrophic cardiomyopathy caused by cardiac myosin-binding protein C gene mutations, 315
Diastolic heart failure, diastolic left ventricular dysfunction and exercise intolerance (editorial), 803
Discrete subaortic stenosis in adults: increased prevalence and slow rate of progression of the obstruction and aortic regurgitation, 835
Full-motion pulse inversion power Doppler contrast echocardiography differentiates stunning from necrosis and predicts recovery of left ventricular function after acute myocardial infarction, 1390
Hypertensive left ventricular hypertrophy: relation to peripheral sympathetic drive, 1711
Impact of cardiac resynchronization therapy using hemodynamically optimized pacing on left ventricular remodeling in patients with congestive heart failure and ventricular conduction disturbance, 1957
Left ventricular mass and cardiovascular morbidity in essential hypertension: the MAVI study, 1829
Long-term left ventricular pacing: assessment and comparison with biventricular pacing in patients with severe congestive heart failure, 1966
Neutralization of interleukin-1β in the acute phase of myocardial infarction promotes the progression left ventricular remodeling, 1546
Non-invasive single-beat determination of left ventricular end-systolic elastance in humans, 2028
Outcome of patients with hypertrophic obstructive cardiomyopathy after percutaneous transluminal septal myocardial ablation and septal myectomy surgery, 1994
Prognostic evaluation of neurohumoral plasma levels before and during beta-blocker therapy in advanced left ventricular dysfunction, 436
Prognostic impact of diabetes mellitus in patients with heart failure according to the etiology of left ventricular systolic dysfunction, 421
Rapid evaluation of left ventricular volume and mass without breath-holding using real-time interactive cardiac magnetic resonance imaging system, 527
Reduced kidney function and anemia as risk factors for mortality in patients with left ventricular dysfunction, 955
Relation of thallium uptake to morphologic features of chronic ischemic heart disease: evidence for myocardial remodeling in noninfarcted myocardium, 84
Relationship between plasma level of cardiotrophin-1 and left ventricular mass index in patients with dilated cardiomyopathy, 1485
Relationship between transcardiac extraction of aldosterone and left ventricular remodeling in patients with first acute myocardial infarction: extracting aldosterone through the heart promotes ventricular remodeling after acute myocardial infarction, 1375
Relationship of the electrocardiographic strain pattern to left ventricular structure and function in hypertensive patients: the LIFE study, 514
Time course and determinants of left ventricular function recovery after primary angioplasty in patients with acute myocardial infarction, 464
Time course of cardiac structural, functional and electrical changes in asymptomatic patients after myocardial infarction: their inter-relation and prognostic impact, 33
Transient left ventricular apical ballooning without coronary artery stenosis: a novel heart syndrome mimicking acute myocardial infarction, 11

Letters to the editor

Absolute, not relative, changes are important when interpreting trial data, 2132
Acute ethanol exposure fails to elicit preconditioning-like protection in in situ rabbit hearts because of its continued presence during ischemia, 1271
Atrial fibrillation and sinus node dysfunction, 1585

Silent ischemia predicts poor outcome in high-risk healthy men (editorial), 80
Troponin measurements in ischemic heart disease: more than just a black and white picture (editorial), 987

Myocardial necrosis
Full-motion pulse inversion power Doppler contrast echocardiography differentiates stunning from necrosis and predicts recovery of left ventricular function after acute myocardial infarction, 1390

Myocardial perfusion
Peripheral vascular endothelial function testing as a noninvasive indicator of coronary artery disease, 1843
Prognostic value of dobutamine stress technetium-99m-sestamibi single-photon emission computed tomography myocardial perfusion imaging: stratification of a high-risk population, 1511
Variability of myocardial perfusion defects assessed by thallium-201 scintigraphy in patients with coronary artery disease not amenable to angioplasty or bypass surgery, 1033

Myocardial reduction
Pressure-guided nonsurgical myocardial reduction induced by small septal infarctions in hypertrophic obstructive cardiomyopathy, 846

Myocardial stunning
Full-motion pulse inversion power Doppler contrast echocardiography differentiates stunning from necrosis and predicts recovery of left ventricular function after acute myocardial infarction, 1390
Inhibition of caspase-3 improves contractile recovery of stunned myocardium independent of apoptosis inhibitory effects, 2063
Nitric oxide synthase inhibitors decrease coronary sinus-free radical concentration and ameliorate myocardial stunning in an ischemia-reperfusion model, 546

Myocardial viability
Intracardiac measurement of pre-ejection myocardial velocities estimates the transmural extent of viable myocardium early after reperfusion in acute myocardial infarction, 1748
Intravenous myocardial contrast echocardiography predicts recovery of dysnergic myocardium early after acute myocardial infarction, 19
Myocardial viability assessment by endocardial electroanatomic mapping: comparison with metabolic imaging and functional recovery after coronary revascularization, 91
Patient management guided by viability imaging (letter), 1271

Myocardium
Intracardiac measurement of pre-ejection myocardial velocities estimates the transmural extent of viable myocardium early after reperfusion in acute myocardial infarction, 1748
Nuclear factor kappa-B and the heart, 307
Regulation of myocardial βARK1 expression in catecholamine-induced cardiac hypertrophy in transgenic mice overexpressing α_{1B}-adrenergic receptors, 534
Relation of thallium uptake to morphologic features of chronic ischemic heart disease: evidence for myocardial remodeling in noninfarcted myocardium, 84
Validation of in vivo myocardial strain measurement by magnetic resonance tagging with sonomicrometry, 555

Na+/H+ exchange
Cardioprotective therapy and sodium-hydrogen exchange inhibition: current concepts and future goals (editorial), 1651
Na+/H+ exchange inhibitor eniporide as an adjunct to early reperfusion therapy for acute myocardial infarction, 1644

Naxos disease
Genotype-phenotype assessment in autosomal recessive arrhythmogenic right ventricular cardiomyopathy (Naxos disease) caused by a deletion in plakoglobin, 1477

Neointima
Pressure rinsing of coronary stents immediately before implantation reduces inflammation and neointimal hyperplasia, 562
Prevention of intimal hyperplasia with recombinant soluble P-selectin glycoprotein ligand-immunoglobulin in the porcine coronary artery balloon injury model, 577
Redilation of endovascular stents in congenital heart disease: factor implicated in the development of restenosis and neointimal proliferation, 521

Neurohumoral factors
Prognostic evaluation of neurohumoral plasma levels before and during beta-blocker therapy in advanced left ventricular dysfunction, 436

Neurologic dysfunction
Decrease in jugular venous oxygen saturation during normothermic cardiopulmonary bypass predicts short-term postoperative neurologic dysfunction in elderly patients, 1450

New methods
Rapid evaluation of left ventricular volume and mass without breath-holding using real-time interactive cardiac magnetic resonance imaging system, 527

Nitric oxide
An inhibitor of inducible nitric oxide synthase decreases forearm blood flow in patients with congestive heart failure, 1470
Augmented oxidative stress of platelets in chronic smokers, 1320
Cardiac nitric oxide production due to angiotensin-converting enzyme inhibition decreases beta-adrenergic myocardial contractility in patients with dilated cardiomyopathy, 429
Physical training in patients with chronic heart failure enhances the expression of genes encoding antioxidative enzymes, 194

Pulmonary vasoreactivity in PPH (letter), 1267
Tetrahydrobiopterin improves endothelial dysfunction in coronary microcirculation in patients without epicardial coronary artery disease, 493
Uric acid is closely linked to vascular nitric oxide activity, 1850
Vascular endothelial growth factor: angiogenesis, atherogenesis or both? (letter), 2137

Nitric oxide synthase
An inhibitor of inducible nitric oxide synthase decreases forearm blood flow in patients with congestive heart failure, 1470
Augmented oxidative stress of platelets in chronic smokers, 1320
Evidence supporting abnormalities in nitric oxide synthase function induced by nitroglycerin in humans, 1096
Nitric oxide synthase inhibitors decrease coronary sinus-free radical concentration and ameliorate myocardial stunning in an ischemia-reperfusion model, 546

Nitroglycerin
Differential effects of pentaerythritol tetranitrate and nitroglycerin on the development of tolerance and evidence of lipid peroxidation: a human in vivo study, 854
Does nitroglycerin therapy hit the endothelium? (editorial), 1102

Tetrahydrobiopterin improves endothelial dysfunction in coronary microcirculation in patients without epicardial coronary artery disease, 493

Tetralogy of Fallot
Adrenergic nervous activity in patients after surgical correction of tetralogy of Fallot, 2043

Thallium
Relation of thallium uptake to morphologic features of chronic ischemic heart disease: evidence for myocardial remodeling in noninfarcted myocardium, 84
Variability of myocardial perfusion defects assessed by thallium-201 scintigraphy in patients with coronary artery disease not amenable to angioplasty or bypass surgery, 1033

Thermal therapy
Repeated thermal therapy improves impaired vascular endothelial function in patients with coronary risk factors, 1083

Thromboembolism
Prevalence of left atrial chamber and appendage thrombi in patients with atrial flutter and its clinical significance, 778
Pulmonary artery reflection for differentially diagnosing primary pulmonary hypertension and chronic pulmonary thromboembolism, 214

Thrombolysis In Myocardial Infarction trial
Should we catheterize all patients with unstable angina? No—only the ones with coronary artery disease (editorial), 977
TIMI frame count immediately after primary coronary angioplasty as a predictor of functional recovery in patients with TIMI 3 reperfused acute myocardial infarction, 977

Thrombus
Blood thrombogenicity in type 2 diabetes mellitus patients is associated with glycemic control, 1307
Does the presence a thrombus seen on a coronary angiogram affect the outcome after percutaneous coronary angioplasty? An angiographic trials pool data experience, 624
Expression of exogenous tissue factor pathway inhibitor in vivo suppresses thrombus formation in injured rabbit carotid arteries, 569
Randomized, placebo-controlled trial of enoxaparin after high-risk coronary stenting: the ATLAST trial, 1608

Tissue factor pathway inhibitor
Expression of exogenous tissue factor pathway inhibitor in vivo suppresses thrombus formation in injured rabbit carotid arteries, 569

Tissue plasminogen activator
Potentiation of bradykinin-induced tissue plasminogen activator release by angiotensin-converting enzyme inhibition, 1402

Tobacco use
See Smoking

Tolerance
Differential effects of pentaerythritol tetranitrate and nitroglycerin on the development of tolerance and evidence of lipid peroxidation: a human in vivo study, 854

Tomography
See Electron beam tomography; Positron emission tomography; Single-photon emission computed tomography

Torsade de pointes
Pause-dependent torsade de pointes following acute myocardial infarction, 1168

Transesophageal echocardiography
See also Echocardiography
Outcome of mild periprosthetic regurgitation detected by intraoperative transesophageal echocardiography, 163
Prevalence of left atrial chamber and appendage thrombi in patients with atrial flutter and its clinical significance, 778

Transmitral pressure drop
Space and time dependency of inertial and convective contribution to the transmitral pressure drop during ventricular filling (letter), 290

Transplantation
See Heart transplantation

Transthoracic echocardiography
See also Echocardiography
Echocardiographic assessment of obstructive lesions in atrioventricular septal defects, 253
Modulation of coronary flow velocity reserve by gender, menstrual cycle and hormone replacement therapy, 1879
Noninvasive detection of total occlusion of the left anterior descending coronary artery with transthoracic Doppler echocardiography, 1328

Troponins
Angiotensin-converting enzyme inhibition is associated with reduced troponin release in non-ST-elevation acute coronary syndromes, 724
Mechanisms behind the prognostic value of troponin T in unstable coronary artery disease: a FRISC II substudy, 979
Prognostic value of serum cardiac troponin I in ambulatory patients with chronic heart renal failure undergoing long-term hemodialysis, 991
Prognostic value of troponin in patients with non-ST elevation acute coronary syndromes: a meta-analysis, 478
Testing the wrong hypothesis: the failure to recognize the limitations of troponin assays (editorial), 999
Troponin measurements in ischemic heart disease: more than just a black and white picture (editorial), 987

T-wave alternans
Effect of metoprolol and *d,l*-sotalol on microvolt-level T-wave alternans, 2013

Twin-twin transfusion syndrome
Acquired right ventricular outflow tract obstruction in the recipient twin in twin-twin transfusion syndrome, 1533

Ultrafiltration
Circulatory response to fluid overload removal by extracorporeal ultrafiltration in refractory congestive heart failure, 963

Ultrasound
Elective stenting of unprotected left main coronary artery stenosis, 1054
Impact of lipid abnormalities in development and progression of transplant coronary disease: a serial intravascular ultrasound study, 206
Impact of pre-interventional arterial remodeling on subsequent vessel behavior after balloon angioplasty: a serial intravascular ultrasound study, 2001
Intravascular ultrasound-guided percutaneous transluminal coronary angioplasty with provisional spot stenting for treatment of long coronary lesions, 1427
Mechanical and structural characteristics of vulnerable plaques: analysis by coronary angioscopy and intravascular ultrasound, 99
Noninvasive quantitative tissue characterization and two-dimensional color-coded map of human atherosclerotic lesions using ultrasound integrated backscatter, 486
Optimizing stent expansion with new stent delivery systems, 1622
Peripheral vascular endothelial function testing as a noninvasive indicator of coronary artery disease, 1843

Unstable angina pectoris
See Angina pectoris

Uric acid
Uric acid is closely linked to vascular nitric oxide activity, 1850

Valsartan
Effects of combination of angiotensin-converting enzyme inhibitor and angiotensin receptor antagonist on inflammatory cellular infiltration and myocardial interstitial fibrosis after acute myocardial infarction, 1207

Valve disease
See also Aortic valve; Mitral valve
Aortic valve stenosis and aortic atherosclerosis: different manifestations of the same disease?, 827
Association of mitral annulus calcification, aortic valve sclerosis and aortic root calcification with abnormal myocardial perfusion single photon emission computed tomography in subjects age ≤ 65 years old, 1988
C-reactive protein is increased in patients with degenerative aortic valvular stenosis, 1078
Echocardiographic characteristics and outcome of straddling mitral valve, 819
Interaliasing distance of the flow convergence surface for determining mitral regurgitant volume: a validation study in a chronic animal model, 1195
Interaliasing distances to assess mitral regurgitation: dividing the rainbow of flow convergence (editorial), 1203
Outcome of mild periprosthetic regurgitation detected by intraoperative transesophageal echocardiography, 163

Vascular disease
Age-associated changes in regional aortic pulse wave velocity, 1123

Vascular endothelial growth factor
Vascular endothelial growth factor: angiogenesis, atherogenesis or both? (letter), 2137

Vasoconstriction
Attenuation of angiotensin II-mediated coronary vasoconstriction and vasodilatory action of

angiotensin-converting enzyme inhibitor in pacing-induced heart failure in dogs, 1188
Evidence supporting abnormalities in nitric oxide synthase function induced by nitroglycerin in humans, 1096
Gender differences in wall shear–mediated brachial artery vasoconstriction and vasodilation, 1668

Vasodilation
Attenuation of angiotensin II-mediated coronary vasoconstriction and vasodilatory action of angiotensin-converting enzyme inhibitor in pacing-induced heart failure in dogs, 1188
Effects of lipid-lowering and antioxidant vitamin therapies on flow-mediated vasodilation of the brachial artery in older adults with hypercholesterolemia, 1806
Endothelium-dependent vasodilation is independent of the plasma L-arginine/ADMA ratio in men with stable angina, 497
Flow-mediated vasodilation of the femoral and brachial artery induced by exercise in health nonsmoking and smoking men, 1313
Gender differences in wall shear–mediated brachial artery vasoconstriction and vasodilation, 1668
Mechanisms responsible for endothelial dysfunction induced by fasting hyperhomocystinemia in normotensive subjects and patients with essential hypertension, 1106

Ventilation
Impact of anti-endotoxin core antibodies on endotoxin and cytokine release and ventilation time after cardiac surgery, 124

Ventricles
See Left ventricle; Right ventricle

Ventricular assist devices
Decreased plasma concentration of brain natriuretic peptide as a potential indicator of cardiac recovery in patients supported by mechanical circulatory assist systems, 1942

Ventricular fibrillation
Life-threatening ventricular arrhythmias due to transient or correctable causes: high risk for death in follow-up, 1718
Preinfarct angina protects against out-of-hospital ventricular fibrillation in patients with acute occlusion of the left coronary artery, 1369
Significance of inducible ventricular fibrillation in patients with coronary artery disease and unexplained syncope, 371
Treatable causes of sudden death: not really "treatable" or not really the cause? (editorial), 1725

Ventricular filling
Space and time dependency of inertial and convective contribution to the transmitral pressure drop during ventricular filling (letter), 290

Ventricular tachycardia
Differences in inducibility and prognosis of in-hospital versus out-of-hospital identified nonsustained ventricular tachycardia in patients with coronary artery disease: clinical and trial design implications, 1156
Life-threatening ventricular arrhythmias due to transient or correctable causes: high risk for death in follow-up, 1718
Noninvasive electrocardiogram imaging of substrate and intramural ventricular tachycardia in infarcted hearts, 2071
Treatable causes of sudden death: not really "treatable" or not really the cause? (editorial), 1725

von Willebrand factor
Increased von Willebrand factor in the endocardium as a local predisposing factor for thrombogenesis in overloaded human atrial appendage (letter), 2133

Wall shear stress
Relationship between vascular wall shear stress and flow-mediated dilation: endothelial function assessed by phase-contrast magnetic resonance angiography, 1859

White blood cells
Association between white blood cell count and acute myocardial infarction mortality in patients ò65 years of age: findings from the Cooperative Cardiovascular Project, 1654

White-coat hypertension
Silent and clinically overt stroke in older Japanese subjects with white-coat and sustained hypertension, 238

Women
See also Postmenopausal women; Pregnancy
Absence of gender difference in clinical outcomes in patients with cardiogenic shock complicating acute myocardial infarction, 1395
Coarctation of the aorta: outcome of pregnancy, 1728
Gender and survival: a population-based study of 201,114 men and women following a first acute myocardial infarction, 729
Gender differences and temporal trends in clinical characteristics, stress test results and use of invasive procedures in patients undergoing evaluation for coronary artery disease, 690
Gender differences in wall shear–mediated brachial artery vasoconstriction and vasodilation, 1668
Is early invasive treatment of unstable coronary artery disease equally effective for both women and men?, 41
Modulation of coronary flow velocity reserve by gender, menstrual cycle and hormone replacement therapy, 1879
Prospective evaluation of lipoprotein-associated phospholipase A_2 levels and the risk of future cardiovascular events in women, 1302
